PROCEDURE  
DRAPES**

### EUROGUARD® MINOR PROCEDURE DRAPES

Euroguard® has developed a standard program of small-sized procedure drapes. These drapes can be used for minor surgery but also in draping additional areas during more complicated surgical procedures. The sterile disposable drapes are made of 2-layer material, available with or without adhesive tape or fenestration and offered in various sizes. See specifications alongside.

### DISPENSER BOX

The minor procedure drapes are packed in a dispenser box containing 25 pieces, 4 dispenser boxes per case. Utilizing the dispenser boxes ensures a quick, on hand application as well in the emergency room as in the operating theatre.

### CUSTOM PROCEDURE TRAYS (CPT)

For the more complicated procedures Medica Europe offers CPT's. The custom procedure tray concept offers sterile packages that can be assembled according to the users wishes. The package contains, as complete as possible, all disposable products required for each specific procedure. Our Minor Procedure Drapes can be packed together with our CPT's to offer a complete solution.

For more information visit our website [www.medica-europe.com](http://www.medica-europe.com) or call our customer service desk tel: +31 412 67 13 00.
